A Shopping Experience in Constantinople. On the very first occasion that we visited the bazaars together, A. proposed we should con-ceal the fact that I could speak Turkish, and engage the services of a young Jew, who really spoke English very well, and see how far he would try to rob us. This we did, and soon quisitive wives, had, perhaps, been stolen during some fire, and kept for years, until it was safe to expose it for sale. A now addressd himself to the Jew interpreter:

"Ask the old fellow how much he will take for the clock." stopped and broken by the fingers of his in-

for the clock. Jew, in Turkish—How much a Turk—Twelve pounds. Jew to A. —Sixteen pounds, sare.

Offer him two pounds. for an eye-glass, the latter for tooth-picks.

and destroy you by slow starvation.

clock for fourteen pounds.

This was a little staggering for me, and my

face must have betrayed me to the lynx-cycl case was where a colt's temporary teeth, after A being made aware of the state of affairs by ually upon the gum while the animal was feed-A being made aware of the state of affairs by me, while the Jew had gone to fetch us some coffee. At last the Turk was beaten down till he asked two pounds, and the Jew said four pounds; and then the villain's look of out raged innocence was worth anything, when I could be said for the Turk in Turk in Turk in the Turk in Turk in the said four calculations.

In a moment the young Jew had disappear, became satisfied that the trouble was with their ed.—Barkly's "Between the Dinube and the teeth.

Was the Moon Always Dead?

belief that the whole mass of each member of pain or uneasiness.—Workester (Mass...) Spy. the system was formerly gaseous with intensity of heat, they can no longer doubt that the moon once had seas and an atmosphere of considerathe ble density. The moon has, in fact, passed mended by the Times of India, "congec water," through the same changes as our own earth, or the liquor in which rice has been boiled. though not necessarily in the same exact way. This drink has three excellent qualities—it be though not at the same time nor for so long a rice boiled in it, and thus satisfies hunger; it heat, though this stage also must have contin- ver attacks; and fastly, when taken warm i ued for a much shorter period than the corres-bed, it is good for bad colds and influenza. ponding stage of our earth's history. Must we not conclude that after passing through that stage the moon was for a time a habitable world as our earth is now? The greatest massearth her seas enwrapped her in cloud form, must at length have taken their place as seas upon her surface. The atmosphere which sup- lets, and the like in hot water; if cold be used ported those waters must at first have been a brighter and clearer appearance is left dense compared with the present lunar atmosphere, perhaps, even by comparison with the particularly soiled, a pinch of soda in the watpresent atmosphere of our earth. The glow-er will cleanse it easily. ing surface of the moon gradually cooled, unwho hold that nature makes nothing in vain, and full of juice. will need only to ask whether the support of life is the one sole purpose which a planet can Others who, looking around at the workings milk to be maintained, by the best breed that of nature as known to us, perceive, or think was ever created, when the pastures are sere, be supposed to have been primarily intended, as many younglings of animals perish untimely, as even many races and types fail of their apparent primary purpose, so our moon, and possibly many such worlds, may never came to subserve that one purpose for which the its ready conversion.—Detroit Free Press. orbs peopling space can be supposed to have been formed, if purpose indeed reigns through-

out the universe.—Cornhill Magazine. Some Astronomical Notes for August.
